

How to Print the Sunday Half-Sheet

First Baptist Church Muncie · Work room Mac

What changed: the file is now a **PDF** instead of a web page. Everything else is the same. You do **not** need to open a browser.

1. Wake up the Mac

Press any key. If it asks for a password, type:

Worship

Capital W, then lower-case. No space.

2. Open the Wednesday Weekly folder

Click the blue **Finder** face in the dock at the bottom of the screen. In the list down the left side, click **Google Drive**, then open the **Wednesday Weekly** folder.

3. Find this week's file

FBC Half-Sheet.pdf

The name is the same every week — the file inside is updated. **Check the date** in the top corner of the page before printing. It should be this coming Sunday.

There is also a file called **Whos Serving Sunday.pdf**. That one is **not** printed with the bulletin. Leave it alone unless the Pastor asks for it.

4. Open it and print

Double-click the file. It opens in **Preview**. Then hold **Command** and press **P**.

5. Check these four settings

Setting	Set it to
Copies	30
Two-Sided (Double-sided)	ON — flip on Short Edge
Orientation	Landscape (the wide one)
Scale / Size	100% — do not tick “Fit to Page”

30 copies makes 60 half-sheets — each sheet is cut in half.

6. Print one first

Set Copies to **1** and print a test page. Check that:

- Announcements are on one side, the order of worship on the other
- Nothing is cut off at the edges
- Both halves of the sheet look the same

If it looks right, print the other **29**.

7. Cut the stack in half

Cut across the middle, the short way, along the dashed line — **60 half-sheets**.

If something looks wrong

- **Old date on the page?** The new file may still be uploading. Wait five minutes and open it again.
- **Can't find the file?** Check you are in the **Wednesday Weekly** folder under Google Drive.
- **Anything else?** Call the church office at **765-284-7749**. Do not reprint the whole stack while unsure.
